### Where & When

Thursday, July 29th  
Time: 10 am - 7 pm  
23 Dupaw Gould Rd,  
Brookline NH

### [About Colin Kimball-Davis](#)

<http://www.theenglishsaddler.com/>

Colin has been fitting, adjusting and repairing saddles for two decades. As an experienced horseman who has ridden, competed, and managed both riding schools and hunt clubs for many years, he is sensitive to the needs of both horses and riders. Colin can adjust flocking, change foam panels to wool panels, replace billets or a worn seat and often fix a broken tree as well!

Colin now utilizes Tekscan saddle fitting technology...thin-film sensor technology to assess the relationship between the rider, saddle, and horse. The Tekscan technology provides Colin with quantifiable data to ensure proper contour and positioning of the saddle thus improving the comfort and performance of your animal.

### [About Jennifer Brooks, PT, MEd.](#)

[CERPhhttp://www.equinerehabservices.com](http://www.equinerehabservices.com)

Jennifer started her professional career as a licensed Physical Therapist (PT) graduating with a B.S. in PT from Russell Sage College, Troy, NY, in 1985. She went on to receive her M.Ed from Rivier College, Nashua, NH in 1995. She has taught at two are colleges in the Master's PT Programs at University of Massachusetts, Lowell, and at Notre Dame College, Manchester, NH. She most recently taught at the NH Technical Community College teaching Practical Equine Anatomy and Physiology with in their Equine Body Work Program in Fall of 2007.
