

Rehabilitation: (rē'hə-bīl'ī-tā-sh'ən) n. *To restore to former excellence.*

VOLUME 1 ISSUE 1: NOVEMBER 1, 2010

Does Your Horse Lack Impulsion?

Do You Suspect He Is Struggling With Stifle Problems?

Could His Hind End Use Some Strength And Bulk?

*IF SO, THAN YOU SHOULD COME TO
EQUINE AFFAIRE THIS COMING*

THURSDAY NOVEMBER 11TH

*AND ATTEND TWO PRESENTATIONS BY
JENNIFER BROOKS, EQUINE PHYSICAL
THERAPIST*

Power Point Seminar at 3pm:

Evaluation & Rehabilitation of Stifle Dysfunction: A Common Problem in Today's Performance & Backyard Horse (Seminar Stage, Better Living Center)

Followed by a 5pm demonstration of:

Methods for Strengthening the Horse's Stifle & Hindquarters for Full Recovery (Demo Ring, Mallary Arena)

These two presentations will teach you how to identify stifle dysfunction and what you can do to start addressing it with simple in-hand exercises, and progressing into more advanced techniques that your horse can benefit from. By strengthening the hind end with these specific exercises, your horse can improve his gaits, with improved limb flight patterns to show off his best performance under saddle.

Events & News
